

INTELLI-PLAC[®]

NEW!! INTELLI-PLAC[®] SILVER Series with BIOMASTER[®] DURABLE ANTIMICROBIAL PRODUCT PROTECTION 24/7

PLACARD LABEL HOLDERS

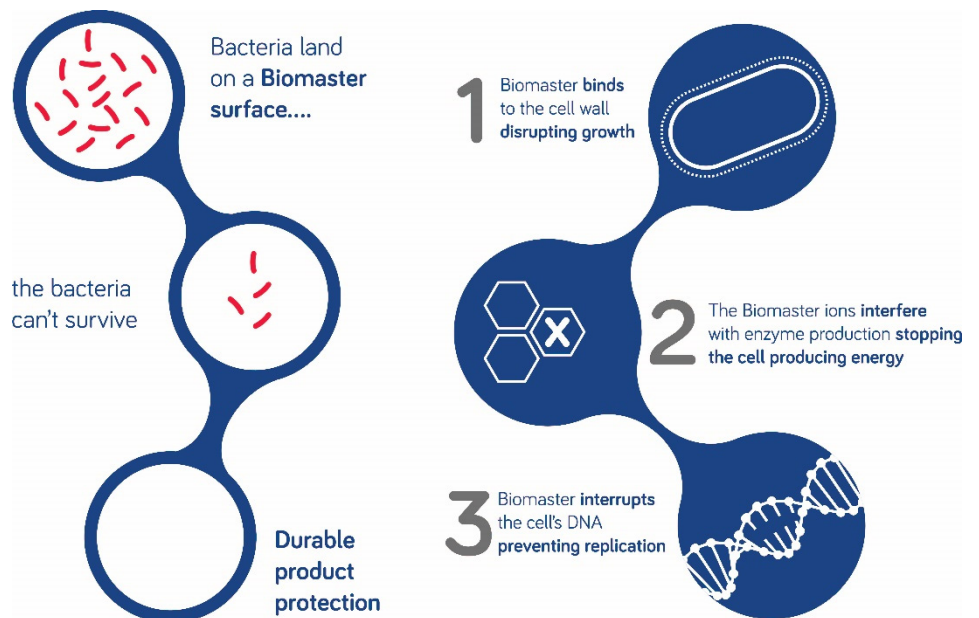

Our newest INTELLI-PLAC[®] placard label holder, the SILVER Series, is protected 24/7 with Biomaster[®] silver ion antimicrobial technology. This ensures a 99.9% cleaner surface from damaging microbes versus untreated surfaces. The durable Biomaster[®] protection will last the lifetime of the INTELLI-PLAC[®] placards.

These durable placards with our X2 extra durable adhesive can also be cleaned and sanitized multiple times. No silicone so they can be recycled with HDPE and PP containers and do not contaminate surfaces.

INTELLI-PLAC[®] ADVANTAGES

- **No silicone or other top coatings** to wear or flake off and contaminate products, equipment or work areas.
- **More durable than other placards** Embossed surface holds up to washing, chemicals, variable temperatures and extreme weather better than multi-layer silicone or other top coated placards.
- **Sustainable**

Can be recycled/reground on the container.
- **Easier to apply** than other thinner placards. Save time and reduce waste.
- **Extensive re-use and re-labeling** - embossed polymer surface prevents adhesive residue buildup.
- **Save time** scraping labels; **save money** on missed shipments, mislabeled racks and containers, inventory errors and **reduce customer complaints**.

HOW BIOMASTER[®] WORKS

Silver is a natural antimicrobial used for thousands of years.

Disinfectant sprays & wipes are only effective for about two hours. After that bacteria can grow on the surface.

Biomaster[®] protected surfaces offer round-the-clock protection against the growth of damaging bacteria.
