## SOHN ROTARY WIZARD 1000-WF DIGITAL FINISHER

**Auto-registering modular rotary laminating and die-cutting label press.**

### The Wizard 1000-WF SPECIFICATIONS:

**One pass** complete finishing of preprinted labels. Laminate, die cut, strip matrix, slit and rewind onto cores.

**USA** constructed in Wisconsin **UL approved**

**60 years** Sohn been in business building label making equipment

**Aluminum plate** anodized 25mm thick construction

**Servo motors** utilized on all driven mandrels and die station.

**Adjustable reader** for black marks adjusts across the full web width

**Mandrels** are 3" OD with mechanical lock down. Does not require compressed air supply.

**Automatic register** of position the rotary cutting die to cut the material in register with the printed image.

**Touch control panel** to easy to operate. One step to home the cutting die in register

**Magnetic rotary** die-cutting cylinder Non-removable that utilizes economical flex dies.

**Die-cutting** station uses a digital controlled operating system

**Modular design** that can be updated at later date by adding other options listed below.

**110 Volts** electric supply.

### Advantages of the Sohn Rotary Wizard

Short web path from unwind to finish... ideal for short run jobs. Less wasted labels webbing the press.

Web widths from 1" up to 10"

Semi rotary die cutting to 15" On full rotary 16" long labels.

Maximum die cutting width 9.5" to strip

No change of die cutting cylinders, Same magnetic cylinder using inexpensive flex dies

Operating speed variable 0 to 30 feet per minute – dependent on length of cutting die.

Laminates with self wound lamination instead of more expensive liner lamination.

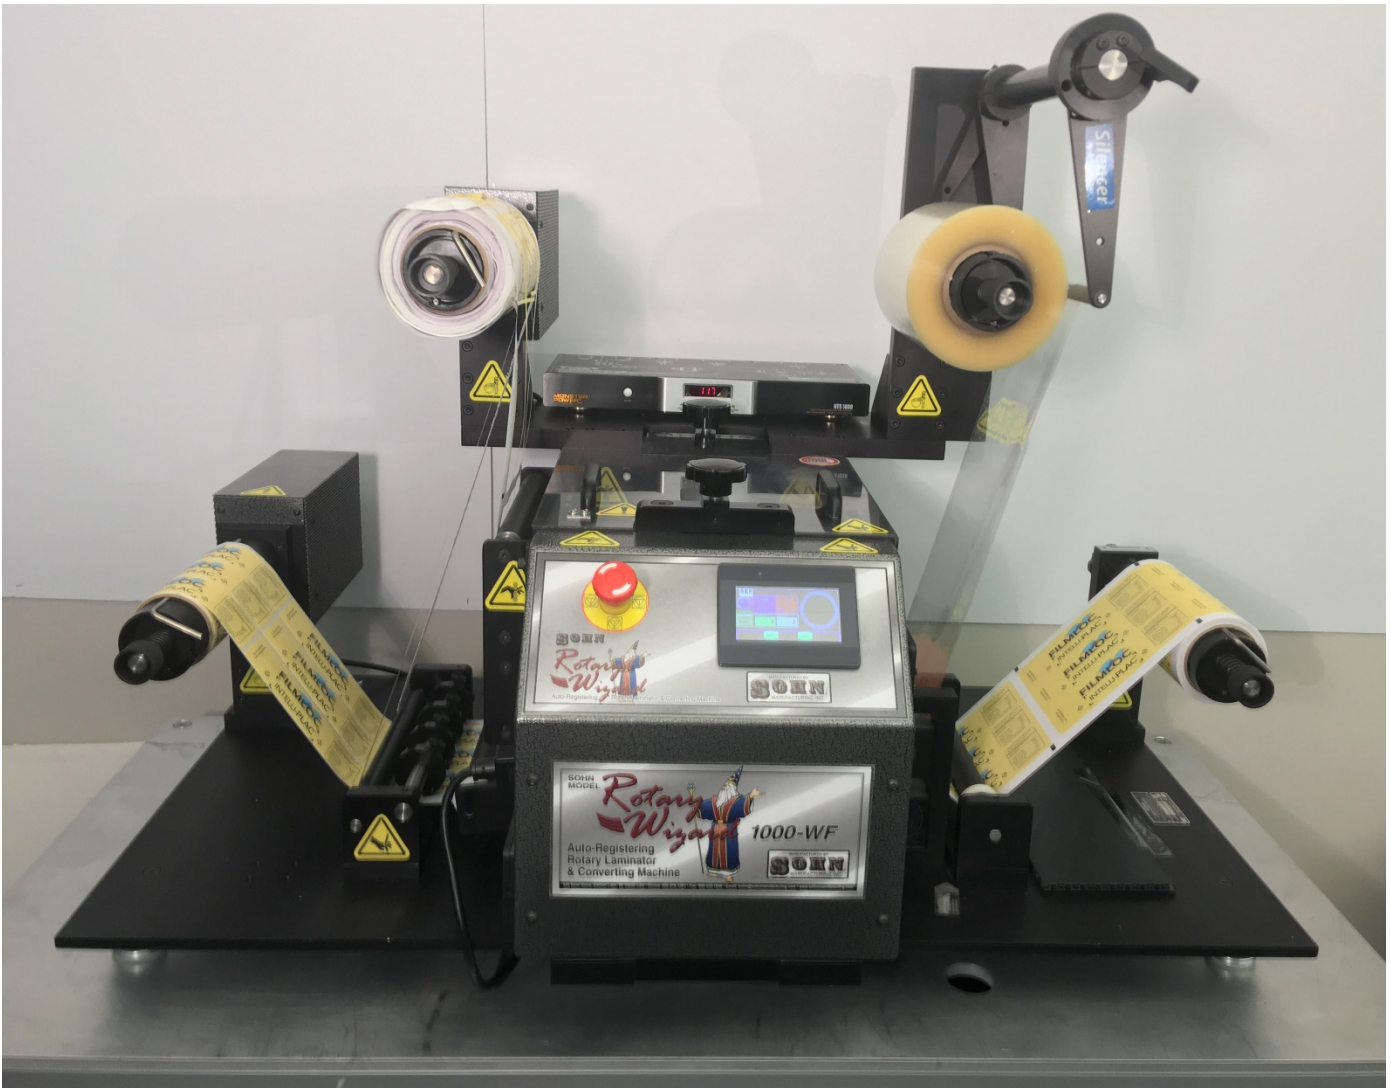

14" OD unwind roll. Waste Matrix rewind 14" roll, Finished Product Rewind 14" roll

Compact design easily fits on work bench
